NetSuite is The World's Most Customizable and Extensible Application Service

NetSuite's NetFlex technology platform customizes and extends NetSuite to meet your specific company and industry requirements for personalization, business processes and best practices. And with NetFlex, you can build entire applications hosted within NetSuite. No on-demand application service is more customizable or extensible. With NetSuite, you benefit from the following:

- **NetFlex Customization:** Easy-to-use, point-and-click tools provide unlimited personalization, configuration, and vertical tailoring.
- **NetFlex Web Services:** Use Simple Object Access Protocol (SOAP), standards-based, Web service APIs to extend NetSuite to other systems, third-party vertical applications, or to build add-on capabilities.
- **NetFlex AppBuilder:** Build entire applications within NetSuite. Custom object, tab and code capabilities allow entire applications to be built and hosted within NetSuite, providing all the benefits of a robust application architecture with cost-effective application hosting.
- **NetFlex Verticals:** Unique on-demand, template cloning capabilities combine with NetFlex customization, NetFlex Web services and NetFlex AppBuilder to facilitate a library of industry verticals, which can be further customized to meet specific business requirements.

Never settle for a "one size fits all" hosted application solution. With NetFlex, NetSuite becomes your company's personalized software, complete with your terminology, corporate branding, key data points, and business processes. Standards-based Web services make it simpler to extend NetSuite to other systems, vertical solutions, and third-party capabilities. NetFlex configuration and customization carry forward seamlessly with upgrades, eliminating maintenance hassles. Plus, applications you build using NetFlex are hosted within NetSuite, which comes complete with a 99.5 percent uptime guarantee, robust Oracle and J2EE architecture, and world-class security infrastructure. With NetFlex, customization and verticalization have never been easier.
